SUMMARY

Software Engineer with 3.5 years at Accops (secure remote-access and VDI software): 2.5 years building Java test automation (Selenium, TestNG, Jenkins CI/CD), now developing C++ features and managing Jenkins/Git builds in the VDI team. Hands-on with Java 17, Spring Boot 3, Spring Data JPA, Kafka, MySQL and Docker through personal projects; focused on Java backend development. Earlier, 4+ years delivering SCADA and substation-automation projects in India, Kuwait and Bangladesh.

SKILLS

Languages: Java, SQL, Go, JavaScript, C++ (working knowledge)

Backend: Spring Boot, Spring Data JPA, Hibernate, Spring Security (JWT), REST APIs, Microservices, Apache Kafka, OpenAPI/Swagger

Testing & CI/CD: Selenium WebDriver, TestNG, JUnit, Jenkins CI/CD pipelines, Maven

Databases: MySQL, PostgreSQL, MongoDB

Tools: Git, Docker, Docker Compose, Linux, IntelliJ IDEA, AI-assisted development (Claude Code)

EXPERIENCE

Accops · Pune, India

Apr 2023 – Present

Associate Engineer, Automation (Apr 2023) → Software Engineer (Apr 2024) → Software Engineer 2 (Apr 2025)

C++ Development · VDI Team

Oct 2025 – Present

- Develop C++ features for Accops' VDI product to improve the end-user virtual desktop experience, using Claude Code for AI-assisted development.
- Manage the VDI team's builds with Jenkins and Git.

Test Automation

Apr 2023 – Sep 2025

- Automated 300+ web UI regression test cases in Java with Selenium WebDriver and TestNG, running after every build in the Jenkins CI/CD pipeline.
- Built a test automation framework from scratch and extended the team's existing framework.
- Automated and stabilised the BAT (build acceptance) and sanity suites; recognised with the Accops Special Kudos award (Mar 2024).

Reliserv Solution · SCADA Engineer · Panvel

Dec 2021 – Jun 2022

- Designed HMI/SCADA screens, integrated relays and multi-function meters, and commissioned SCADA systems and control & relay panels for the Waluj (Aurangabad), Ghorasal and Jhenaidah (Bangladesh) substations.

Ashida Electronics · Project Engineer · Thane

Jan 2018 – Dec 2021

- Managed on-site commissioning and resolved operational issues with testing staff, delivering projects before deadlines: Al-Zour Oil Refinery (Kuwait); Mangaon, Kankavli and Volkswagen traction substations.

PROJECTS

Library Management System | Java 17, Spring Boot 3, Kafka, MySQL, Docker

2024 – in progress

- Building three Spring Boot microservices (books, customers, borrowing) that publish and consume domain events over Apache Kafka, with each service keeping a local copy of the data it needs.
- Services run with Docker Compose alongside MySQL and Kafka (KRaft) and start once MySQL is healthy; REST APIs documented with OpenAPI/Swagger.

Ghar Ka Dabba – tiffin subscriptions | Spring Boot, Spring Security, JWT, MySQL, React

2023

- Two-person PG-DAC capstone; built most of the Spring Boot backend: REST APIs for customers, vendors and admins covering subscription plans, orders, payments and image uploads.
- Implemented stateless JWT authentication with Spring Security and BCrypt, plus email OTP (10-minute expiry) for verification and password reset.

Task Management API | Go, Gin, GORM, PostgreSQL, JWT

2025

- REST API with JWT-protected routes, a layered controller/service/repository design and GORM auto-migrations.

EDUCATION

Post Graduate Diploma in Advanced Computing (PG-DAC, 900 hours) · C-DAC, IACSD Pune

2022 – 2023

B.E. Electrical Engineering · Finolex Academy of Management & Technology, Ratnagiri

2013 – 2017

Post Graduate Diploma in Industrial Automation · SAGE Automation

2017 – 2018

CERTIFICATIONS & ACHIEVEMENTS

Achievement: LeetCode 100 Days Badge 2024 (solved problems on 100+ days; top 4.2% of LeetCode users)

Certifications: Master Microservices with Spring Boot and Spring Cloud (Udemy, 2024) · System Design: Low-Level to High-Level (GeeksforGeeks) · Accops Certified Advanced Professional: Digital Workspace, IAM, ZTNA Gateway (2024)
